

# CRIME SCENE CAMP

## at Cedar Crest College

Hosted by the Forensic Science Program

Emphasis will be placed on understanding the roles of investigators and scientists at scenes, crime scene documentation, and recognizing and collecting a variety of evidence types. Attendees will then analyze their evidence, interpret the results, and perform a crime scene reconstruction based on science. On the last day, students will testify to their findings as expert witnesses in a courtroom setting.

Students will learn all aspects of crime scene investigation from forensic science professionals. During this intensive three-day camp, attendees will have the opportunity to learn how to properly process various types of crime scenes including those with fingerprints, bloodstain patterns, bones, and entomologic evidence.

**June 24-26, 2019**  
**8:30 a.m. to 4:30 p.m.**

Curriculum is geared toward 9th and 10th grade students

—  
\$250 course fee  
—

Students will need to pack a lunch each day or purchase a meal ticket for \$6.25 each day they choose to buy lunch.
