

EPSON BrightLink interactive projectors and SOLO interactive module instructions

BrightLink Interactive projector

- For your Epson BrightLink interactive projector installed above your white board, you will have to install some software on your laptop. Please [click here](#) for complete instructions.
- The EasiTeach software that you will be installing is similar to the Promethean ActivInspire software. Training assistance will be available from Chris McCaffrey for its use.
- One pen and one spare pen are in a magnetic case that is attached to your board or on your desk. These pens come with a battery charger, that should be located in a power outlet near your board.
- This projector connects to your computer with a 15-pin VGA cable, as well as a USB connector. Both of these cables are readily visible coming from the projector. **DO NOT DISCONNECT ANY CABLES FROM THIS PROJECTOR.** If you have questions concerning the cables or connections, please email Help Desk.
- A few locations need electrical connections. The Operations Dept. is in the process of connecting power, so if it

Epson SOLO interactive module

- The SOLO interactive module works with your existing projector to create an interactive surface on your whiteboard.
- You will have to install some software on your laptop. Please [click here](#) for complete instructions.
- The EasiTeach software that you will be installing is similar to the Promethean ActivInspire software. Training assistance will be available from Chris McCaffrey for its use.
- One pen and one spare pen are in a magnetic case that is attached to your board or on your desk. You also have rechargeable batteries and charger, and that is located in an outlet near your board.
